BUILDING OPERATIONS

SOUTH AUSTRALIA

DECEMBER QUARTER, 1960

A summary of building operations in South Australia from 1956 to December, 1960, is shown in Table 1 of this bulletin. More detailed information concerning types of houses, other new buildings, employment in the building industry, and dwellings within Local Government areas, is given in Tables 2 to 7 respectively.

SCOPE

This Bulletin includes details of "New Buildings", which include Houses and Flats as well as the classes of building shown in Tables 3 to 5 plus major additions (£5,000 and over) to these buildings (other than houses), but excludes (1) minor alterations, additions, repairs, and renovations, and (2) all construction activity such as railways, bridges, earthworks, water storage, etc.

COMMENTS

As indicated in Table 1, 2,342 new houses were commenced and 2,513 were completed in South Australia during December quarter, 1960. Although completions were the highest on record and exceeded the previous highest total of 2,476 in December Quarter, 1952, by 37, the number of commencements during the quarter fell by 231 from the record of 2,573 new houses commenced in September Quarter, 1960. Nevertheless, commencements of new houses in December Quarter, 1960, numbered 256 in excess of the 2,086 commenced during the December quarter, 1959.

A record number of 283 flats were also completed during the December quarter, 1960.

As may be seen in Table 2, numbers of both contract-built and owner-built houses commenced and completed during the December quarter were less than in the previous three months.

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly, at least, the result of the unequal incidence of individual large contracts. In one case a single contract may be let for a large project thereby inflating values during the quarters covering commencement, construction, and completion of that project, but in another instance a number of small contracts may be let over a protracted period and thus have little apparent effect on the totals for the quarter. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations. The different unit values of new buildings commenced during different periods are shown in Table 5.

The number of persons employed at 14th December, 1960, on all jobs of builders of new buildings (shown in Table 6) was the record total of 14,081 - 449 more than the previous highest total of 13,632 at 30th September, 1960.

Table 7 shows that in recent years a large proportion of home building has been concentrated within a few local government areas. During the December Quarter, 1960, dwellings completed in the Municipal Corporations of Marion, Enfield, Campbelltown, Henley and Grange, Mitcham, West Torrens, and Woodville, comprised 74.5 per cent of the total number of dwellings completed in the 21 Metropolitan local government areas. Completions in the near metropolitan District Councils of Salisbury (which includes Elizabeth) and Tea-Tree Gully together with those in the Whyalla Town Commission area accounted for 57.5 per cent of the dwellings completed outside the metropolitan area.

DEFINITIONS

Values - All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also "Completions"). The values shown in Table 4 represent the value of work actually done on new buildings during the period.

1991-1992 Annual Report

1991-1992 Annual Report

The 1991-1992 Annual Report of the [Organization Name] is a comprehensive overview of the organization's activities, achievements, and financial performance over the past year. It provides a detailed account of the various programs and projects undertaken, as well as the financial statements and budgetary information.

The report is organized into several sections, each focusing on a different aspect of the organization's work. The first section provides an overview of the organization's mission and vision, followed by a detailed description of the various programs and projects undertaken.

The financial section provides a detailed account of the organization's financial performance, including the income statement, balance sheet, and cash flow statement. It also includes a detailed description of the organization's budgetary process and the various financial controls in place to ensure the accurate and timely reporting of financial information.

The report also includes a section on the organization's governance and management, providing a detailed account of the various committees and boards that oversee the organization's activities. It also includes a section on the organization's human resources, providing a detailed account of the various personnel and their roles within the organization.

The report concludes with a section on the organization's future plans and goals, providing a detailed account of the various initiatives and projects that are planned for the coming year. It also includes a section on the organization's contact information, providing a detailed account of the various ways in which the public can get in touch with the organization.

The 1991-1992 Annual Report is a valuable resource for the public, providing a detailed and comprehensive overview of the organization's activities and financial performance. It is a testament to the organization's commitment to transparency and accountability, and a reflection of the hard work and dedication of its staff and volunteers.

The report is available for download from the organization's website, and is also available in print form. It is a valuable resource for the public, providing a detailed and comprehensive overview of the organization's activities and financial performance.

The 1991-1992 Annual Report is a testament to the organization's commitment to transparency and accountability, and a reflection of the hard work and dedication of its staff and volunteers. It is a valuable resource for the public, providing a detailed and comprehensive overview of the organization's activities and financial performance.

The 1991-1992 Annual Report is a testament to the organization's commitment to transparency and accountability, and a reflection of the hard work and dedication of its staff and volunteers. It is a valuable resource for the public, providing a detailed and comprehensive overview of the organization's activities and financial performance.

- 2 -

SOUTH AUSTRALIA

Commencements - A building is recorded as commenced when work on the foundations has begun.

Under Construction - Once commenced, even though work on it may have been temporarily suspended, a building is classified as "Under Construction" until its "Completion" - see next paragraph.

Completions - A building is regarded as having been completed when the contractor has fulfilled the terms of the contract, or in the case of an owner-builder, when the dwelling is either completed or occupied (whichever occurs first). However, the value shown in all cases is that of the building as a finished project as planned.

(a) An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction by sub-contract or day-labour but without the services of a contractor who is responsible for the whole job.

(b) "Other" houses are mainly of fibro-cement or weatherboard construction, e.g. included in the 1,204 "other" type houses completed during 1960 (1,030 contract-built and 174 owner-built) 1,112 were of fibro-cement construction valued at £2,970,000 and 72 of weatherboard, with a value of £251,000. During the December Quarter, 1960, there were 305 (£822,000) fibro-cement and 15 (£62,000) weatherboard houses completed.

Other	1,786	2,110	2,124	2,314	2,317	2,319	2,443	2,503
Total	10,743	12,284	12,911	13,117	13,307	13,306	13,632	14,081

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.

SOUTH AUSTRALIA

TABLE 7. - DWELLINGS IN LOCAL GOVERNMENT AREAS (a) :- NUMBER OF PERMITS & NUMBER COMPLETED

Local Government Area	Year Ended		Quarter Ended
